LILACS

FIFTY BEST VARIETIES

After 26 years of specializing in Lilacs, including the growing of more than 200 varieties and observance of a hundred others.

With a **7** point **Guarantee**

- Point 1.
Trueness to name.
- Point 2.
Shapely and well branched.
- Point 3.
Abundance of own roots.
- Point 4.
Fully up to size specified.
- Point 5.
Free of disease and insects.
- Point 6.
Exceptionally well packed for fresh and undamaged arrival.
- Point 7.
Free replacement of any failures within six months after planting.

Why Plant Hybrid Lilacs?

Because French Hybrids bloom when 18 inches tall, or immediately after they recover from the shock of transplanting.

They also bloom more freely and more abundantly than the older sorts, and are every bit as hardy and vigorous.

By comparison, they bear myriads of giant trusses, and include a wide range of colors.

They require less attention than roses, evergreens, or fruit trees.

Farr Collections, No. 1 or No. 2

Those who order these Farr selections will receive good named varieties, which if selected specially, would cost from 20 to 50 per cent more. Colors will be well assorted. Plants returnable at our expense if not satisfactory.

Prices apply definitely to 3-4 ft., husky, bushy specimens.

No. 1. **Four French Lilacs** in 4 named varieties. Farr selection, for \$5.

No. 2. **Eight French Lilacs** in 8 named varieties. Farr selection, for \$10.

Collections 1 and 2 for \$14.

During November, 1930, we supplied a regular routine order for 86 Lilacs in 62 varieties, to the New York Agricultural Experiment Station at Geneva, N. Y. This photograph of the plants was made in the Spring of 1934. Every plant is true to name, thriving, and in bloom.
